Camping web application
- Wishlist of destinations
- Camping checklist
- Resources to campsites in area of destination
- Journal section to write and store some photos of accomplished campsites

Styling
- Three actions in separate columns
- Background to be a culmination of camping areas(a little bit of desert, a little bit of forests, a little bit of mountains)
  - Could also be a campfire at the bottom that transitions to the night sky at the top
- Possibly have wishlist saved to an account

Wireframe
- Header- Personal camping journal
- Body- three actions horizontal
  - 1- camping checklist
  - 2- wishlist of destinations
  - 3- resources
    - Possibly a dropdown menu of different resources like maps, weather, camping spots
  - 4- a place to journal and add pictures of camping drips accomplished
- Possibly some sort of login so you can save your diary

Back-end
- MVP 1- display a constant list of items required to enjoy camping trip
  - Be able to check them off as you pack your gear
- MVP 2- be able to take in places you'd like to visit
  - Display places with a picture possibly
  - Similar to the movie rating exercise
- MVP 3- Drop down menu with links to websites that display resources that are beneficial to camping experience
  - Resource for weather, camping availability, road conditions, and possible hazards in the area (wildlife, flash floods, etc…)
- MVP 4- a diary of some sorts
  - Have a text box that saves your personal account of a camping trip
  - Possibly have an area to post a picture
- Creating an account
  - Be able to set up an account that you can save your personal camping journal to
